

# Intermediate SQL

## CASE Statement (If/else)

It is similar to IF / THEN LOGIC.

```
CASE WHEN (CONDITION) THEN (Result)
      ELSE (outcome) END
```

```
AS (COLUMN_NAME) ← This new column
FROM TABLE       is created with 'yes' or
                   NULL values.
```

e.g., CASE WHEN <sup>column</sup> year = 'SR' THEN 'yes'

ELSE NULL END AS is a sensor

FROM b. players

↑  
new column.
